SIGNIFICANT INCREASE IN ACTIVITY ON NORTH VIETNAMESE

NAVAL COMMUNICATIONS

A communications network serving North Vietnamese naval entities has been extremely active since approximately 28 May. The message total for the first six days of June was 74 as compared with monthly totals of 91 for March, 122 for April and 55 for May. The reason for this activity is undetermined. One possible indication was a 5 June order passed to the T167 (a DRV patrol vessel of unidentified type/class) which listed among its other duties "ambush enemy." Place names appearing in these messages indicate that patrols are active along the entire coast of the DRV. (DIST: OSCAR/VICTOR ALFA)
